Note This is one of the most important icons in Photoshop, and one of the first places you should look when you are trying to figure out how to do something. The toolbar with the Edit icon is your primary tool for creating images, regardless of whether you're creating a photo, graphic, or image. In the next sections, we explain how to use the various tools in Photoshop. We think of the

---

Edit tool, or toolbar, as your main tool in Photoshop. The tools (see Figure 7-1) are located where you would expect them on the toolbar, such as the Selection tool, Brush tool, and Lasso tool.

## The Quick Start Window

When you first open Photoshop, a few welcome windows appear. These are designed to get you started, and, more importantly, show you how to use Photoshop to edit images. These windows

---

are called the Quick Start window, the Photoshop Welcome window, and the Photoshop Camera Raw window. The Quick Start window opens immediately. The next two open after you finish a brief tutorial.

Photoshop Elements includes tools that allow you to make creative decisions for your images, such as adjusting the exposure, color, contrast, and black level. The following are the tools Photoshop Elements provides: Selections. Flexible Gradient. 3D Cubic-Bezier Curves. 388ed7b0c7

Assessment of treatment burden in patients with comorbidity with type 2 diabetes mellitus on second-line treatments for type 2 diabetes mellitus. Patients with type 2 diabetes mellitus and comorbidities are the majority of patients with type 2 diabetes. The increasing prevalence of type 2 diabetes and several comorbidities in our patient population led us to assess

---

the burden of treatment in our chronic disease population. We analyzed data from 1176 patients who were treated for type 2 diabetes at a hospital in Taiwan. We evaluated the treatment burden using the Short Form Health Survey (SF-36) and treatment satisfaction using the Diabetes Treatment Satisfaction Questionnaire (DTSQ). The domains of the SF-36 were transformed to the Standard T Scores, and

---

linear regressions were used to identify whether the clinical parameters were related to the treatment burden. The sample was 78% male, and the mean age was 62.8 years. The mean body mass index was 28.4 kg/m<sup>2</sup>. The mean SF-36 scores were lower than the norm for the general population, indicating a high burden of disease. However, the treatment satisfaction was high. Baseline SF-36 scores showed an inverse

---

relationship with diabetes education (SF-36 Mental Component, -2.17; SF-36 Physical Component, -2.13), age (-0.37), and fasting plasma glucose (-0.27) (p 201 Ga. **Q: How to align labels in a**

---

data frame in R with RStudio  
This is my first post here. I am new to RStudio and R programming, and I have been trying to align labels for some data frames. I can't seem to get them to align properly, and even when using some online tools, it doesn't seem to work! For instance, if I look at this data, you can see that the labels for C and D are misaligned in my screen shots: I have tried to fix this using my own labels and a

---

few online tools, but the problems continue. I'm posting my code below:

```
#Closing the library of the CSV file library(readr) #Read in the data df %  
arrange(column_name_5)  
#Remove the first value of column 5 (marked in red) df  
% filter(column_name_5!= 1)  
#Labels for C and D, these are labels that I have created  
df % rename(new_label = column_name_5) #Labels for A and B, these are labels that I have created df %
```

---

rename(new\_label =  
column\_name\_5) What is the  
most simple way to label a  
data frame so that all labels  
are aligned in R? A: Use align  
and cor and wm\_cor: df %  
rename(x = x, y = y) %>%  
gather(key = label, value =  
dim) %>%
